Education

Kalinga Institute of Industrial Technology Bhubaneswar, Odisha

B.Tech in Computer Science and Engineering — CGPA: ***8.76/10*** *Expected May 2027*

- **Relevant Coursework:** DSA, Probability and Statistics, Discrete Mathematics, Machine Learning, Distributed Operating Systems, OOP, DBMS, Computer Networks, Artificial Intelligence, Natural Language Processing, Artificial Intelligence, Software Engineering

Technical Skills

Languages : Python, C++, Java, C, SQL
Core CS : Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks
ML & AI : Machine Learning, Deep Learning, NLP, Generative AI, RAG, Agentic AI, Prompt Engineering
Libraries : Pydantic, Scikit-learn, TensorFlow, Keras, NLTK, Sentence Transformers, LangChain, HuggingFace Transformers, FAISS
Backend : FastAPI, Flask, RESTful API
Databases : MYSQL, PostgreSQL, Pinecone
Tools : Docker, Git, GitHub, Postman, Jupyter Notebook

Projects

Research Lens: Research Paper Analyzer GitHub | Live

LangChain, FAISS, BM25, FASTAPI, Pinecone, PyPDF2, HuggingFace Transformers, Groq-LLama 3.3, Nodejs, React, Vite, Tailwind, Mermaid.js

- Designed and deployed an **End-to-End** Research Paper Analyzer capable of extracting, embedding, and retrieving information from academic PDFs and websites using a **Retrieval-Augmented Generation (RAG)** pipeline.
- Engineered custom document loaders and modular embedding managers using **LangChain** and **Hybrid Retriever FAISS and BM25 (with Pinecone API compatibility)**, achieving scalable and low-latency vector similarity search.
- Built-in support for **Pinecone** allows the app to index thousands of documents effortlessly at Scale with Modern React based UI.

Stock Price Predictor GitHub | Live

Numpy, Pandas, Matplotlib, Scikit-learn, LSTM, SARIMAX, TensorFlow + Keras, Streamlit

- Built a production-ready **Stock Price Prediction System** using **Hybrid LSTM + SARIMAX** architecture to forecast closing prices for publicly listed stocks, integrating **yfinance**-based data ingestion, preprocessing, and a **Train Offline, Infer Online** artifact pipeline for scalable real-time inference.
- Engineered a **4-layer stacked LSTM network** with **50 units per layer**, trained for **100 epochs** using a **100-step sliding window** approach, achieving **95.58% R^2** and **2–3% MAPE** while optimizing deployment with **tensorflow-cpu** and intelligent caching mechanisms.

OmniView: Multi-Agent Debate and Decision System GitHub | Live

CrewAI, Pydantic, LangChain-Groq, Groq API, Llama 3.3, Task Chaining, Context Propagation, Streamlit, Docker

- Architected a **3-agent debate pipeline** (Optimist, Risk Analyst, Moderator) using **CrewAI** to evaluate complex business decisions and generate a **structured, reasoned executive verdict**.
- Implemented **sequential task orchestration** with inter-agent context passing, enabling the Moderator to synthesize outputs from both prior agents before issuing a final judgment.
- Integrated **Groq-hosted Llama model** for sub-second, **low-latency** LLM inference, reducing agent response time significantly compared to standard API calls.
- Built a **Streamlit** web app with session state management, threaded execution, real-time verbose log capture, and side-by-side agent output visualization.

Programs & Leadership

- Selected for **McKinsey Forward Program** *(Apr 2026 – Present)*; building structured problem-solving, communication, and data-driven decision-making skills.
- Selected for **GirlScript Summer of Code 2026** *(Apr 2026 – Present)*; contributing to open-source projects via **Git/GitHub** with active pull requests in progress.
- Completed **Google Arcade Program** (Aug-Dec, 2025); finished **195+** hands-on labs, **50+** courses across cloud and AI tracks.
- **Technical Executive — GenAI & ML, Konnexions (Society at KIIT)** *Dec 2024 – Present*
  - Organizer Committee for **AI Odyssey 2025**, a flagship AI event at KIIT.
  - Member of the **Central Organizing Committee** for the Annual Technical Fest, **KIIT Fest 9.0**.
  - Completed **Konnexions Winter Bootcamp** (Dec 2025 – Jan 2026), an industry-oriented training program.
  - Received **Certificate of Appreciation** for **Codex 1.0**, a competitive coding contest by Konnexions.

Relevant Certifications

- Complete Data Science, Machine Learning, DL & NLP Udemy Course — Mentor: **Krish Naik** (**99+** hours, **400+** lectures); built end-to-end ML/NLP/DL projects with MLOps and deployment workflows.
- Model Deployment using Flask; implemented RESTful API-based ML model deployment pipeline for real-time inference.
- LLM Bootcamp — AI Planet *(Jan 2026)*; gained foundational knowledge of large language models, prompt engineering, and GenAI workflows.
